Bio LinkedIn: [linkedin.com/in/desmond-q-hunt-2606481](https://www.linkedin.com/in/desmond-q-hunt-2606481)

## <1079> Risks and Mitigation Strategies for the Storage and Transportation of Finished Drug Products – Game changer & Rationale

*Glaucia Karime Braga, PhD – Quality Auditor, FURP & Professor, UNIP University USP  
Subcommittee Co-Chair*

Bio LinkedIn: [linkedin.com/in/glaucia-karime-braga-5092d165](https://www.linkedin.com/in/glaucia-karime-braga-5092d165)

## The New <1079.2> Mean Kinetic Temperature in the Evaluation of Temperature Excursions during Storage and Transportation of Drug Products

*Chris Anderson, Quality Director – Cardinal Health USP GC Subcommittee Co-Chair*

Bio LinkedIn: [linkedin.com/in/chris-anderson-25b94b7](https://www.linkedin.com/in/chris-anderson-25b94b7)

### OBJECTIVES

This webinar will discuss the changes in storage and transportation and how they apply to the pharmaceutical supply chain, including:

- Updates made to the USP General Chapter that brings a risk-based approach for pharmaceutical product distribution
- Changes to Packaging and Storage Requirements
- The New Mean Kinetic Temperature in the Evaluation of Temperature Excursions During Storage and Transportation of Drug Products
- What does the USP foresee coming in the next few years?

### WHO SHOULD ATTEND

Regulators, Pharmaceutical industry personnel, healthcare workers, enforcement officers and those involved in the supply chain and logistics of medical products.
